Subject: RE: Checking In Regarding Pending Comments for Flonicamid (Proposed Decision) & Indoxacarb (Streamlined FR)

Importance: High

Thanks, Carmen.

Shanta and I were just discussing the status of one of the items you mention in your email. As I've already mentioned, we're doing the best we can with all of the priorities asked of us, and I'm confident that we have the support of the RD/IO and of the OPP/IO on the prioritization of efforts that we undertake on a daily basis. Also, as an example, please note that we still haven't received any response on aldicarb from the RD/IO, and they've had it since mid-July. So this is just an indication of how many competing priorities are occurring at the management level (to include PMs). That being said, I'm sure that we'll have both documents close to completion, if not entirely completed, by the end of the week. Nonetheless, thank you for your persistence and we'll keep going forward.

Best regards,

Marion J.

Subject: Checking In Regarding Pending Comments for Flonicamid (Proposed Decision) & Indoxacarb (Streamlined FR)

Good afternoon, Marion & Shanta. I am again checking in with you both regarding the completion of your required commenting for flonicamid (proposed decision memo) and indoxacarb (streamlined FR for tolerances), both of which were originally sent for respective reviews on July 20th. I would like to acknowledge that I have already received Shanta's comments on the flonicamid document. If we do not bring these documents forward for RD-IO review very soon, especially the indoxacarb FR, that will cause us to miss the October 12th PRIA conclusion date for indoxacarb yet again. As you might expect, I really do not want to request another extension from FMC for managerial peer review of the FR just like we recently did on August 13th. Collectively, we all need to deliberate on the above matters. Please advise. Regards, Carmen.
